

# Activate\_Windows\_11\_Pro\_free

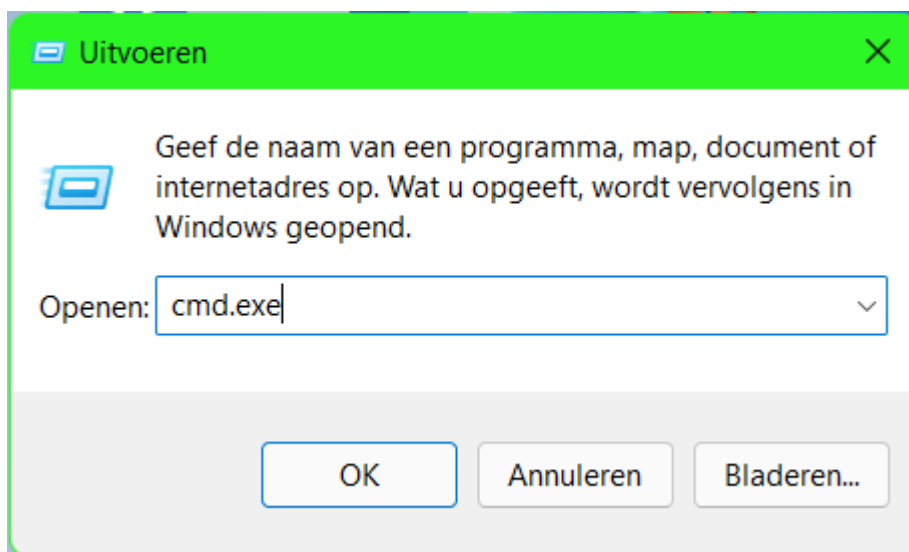

## Getting started

What you first need to do is open CMD (Command Prompt) as Administrator using this keyboard key:

Windows-logo key+ R

And now type in "cmd.exe" in the box

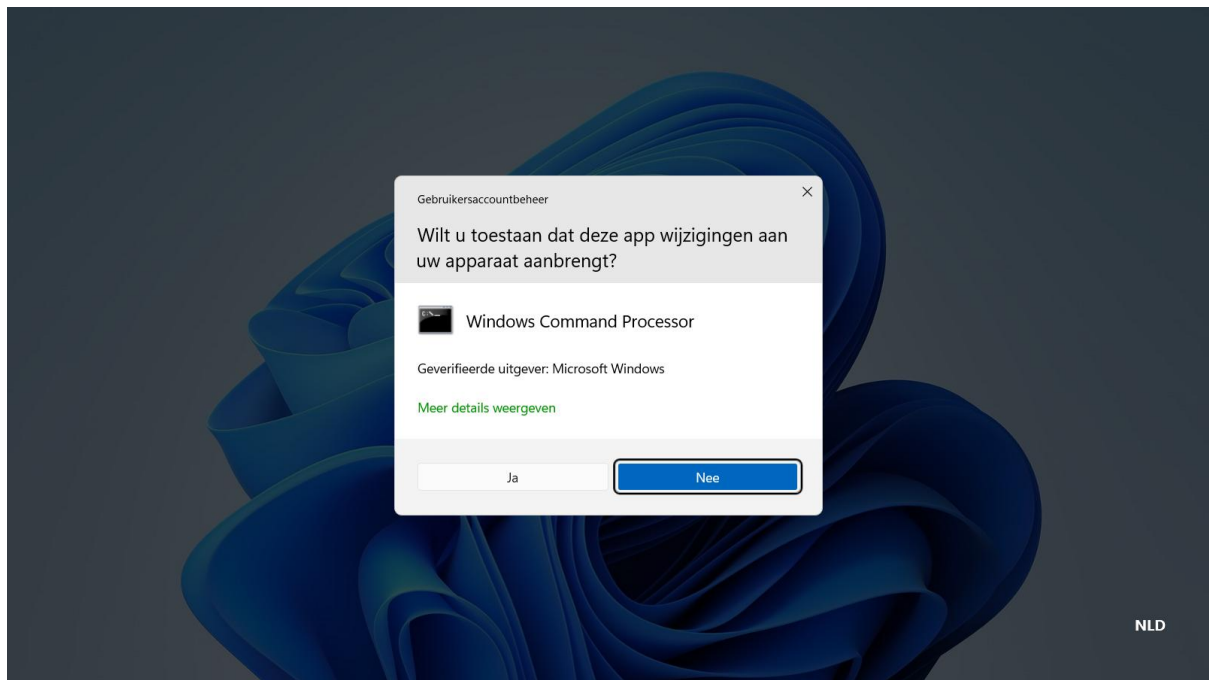

It should now look as something like this:

Now press this keys on your keyboard:

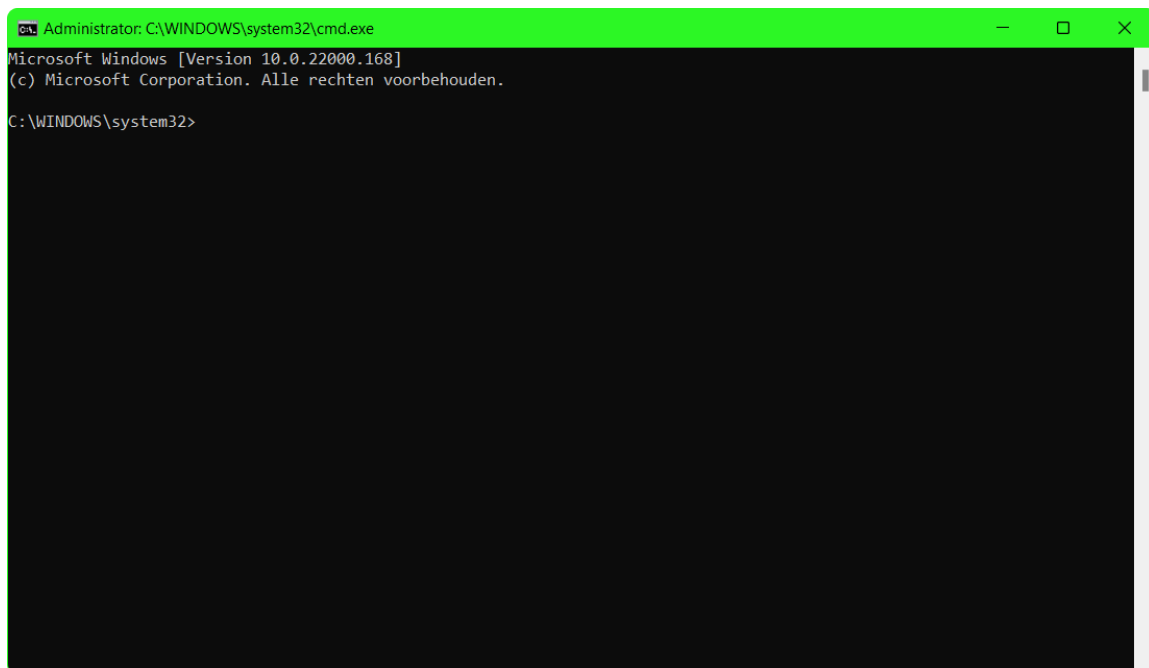

ctrl+shift+enter

Now you have something like this:

Now, click on "yes"

Now you have something like this:

## The commands

Now, type the following command: `s1mgr.vbs /upk` Now it will give an message, click on OK

And now this command: `s1mgr.vbs /cpky` It will give an message once again, and click on OK again

And now type this command: `s1mgr.vbs /ckms` Once again click on OK when you get an message

## **Edition upgradable check command**

Now we are going to check of your edition is supported to upgrade to Pro, run the following command to check this: `DISM /online /Get-TargetEditions` If you see "Professional" in the list, then you can upgrade your Windows edition to Pro for free!

## **Running Windows Pro installer**

Now, copy and paste this complete command:

```
sc config LicenseManager start= auto & net start LicenseManager  
sc config wuauserv start= auto & net start wuauserv  
changePk.exe /productkey VK7JG-NPHTM-C97JM-9MPGT-3V66T  
exit
```

It will run an installer and you will see a message: "% complete"

Now wait until it's 100% and it's not weird that you will get an error

When you get the error, just click Exit and then reboot your pc.

You will now see a message that he is running updates and is installing features, just wait until its done and check "info" in settings, you will see that Windows 11 Pro is installed!

But we are not done, you will see that it isn't activated and that you can't change some settings, now we are going to fix that!

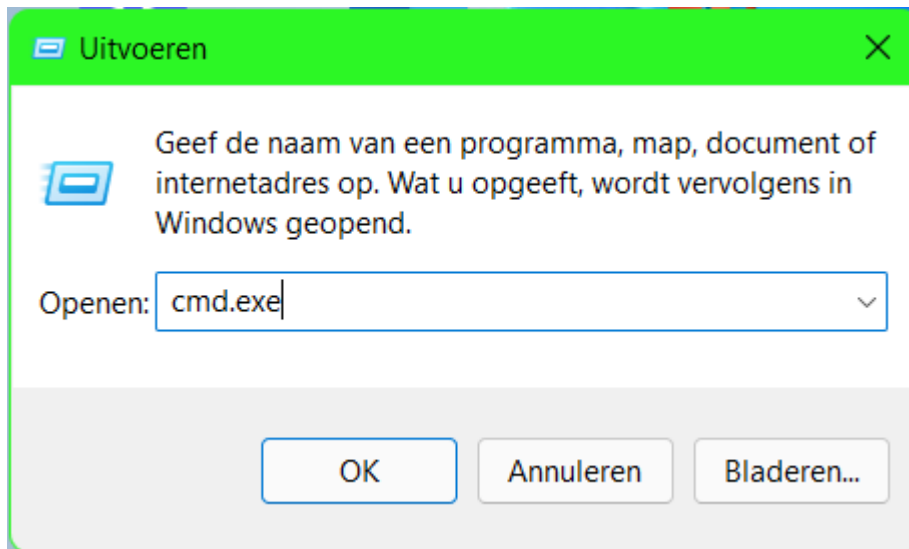

## **Activating Windows Pro**

Now we are going to run some other commands to activate Windows 11 Pro

Press these keyboard keys once again:

Windows-logo key+R

It looks like this again:

Press ctrl+shift+enter

You will get an message, just click on Yes

Now you will get an Command Prompt.

Type the following commands one for one to activate:

```
slmgr /ipk W269N-WFGWX-YVC9B-4J6C9-T83GX  
slmgr /skms kms8.msguides.com  
slmgr /ato
```

Now you have Windows 11 Pro and it activated! You can check settings to see it.
